NOVELTIES AND ITEMS OF SPECIAL MERIT

It has been several years since we have had enough items of special interest to devote a special section to their description. The results of retarded developments are now becoming evident. We cannot list all the meritorious items on these pages, but have selected those that we feel are outstanding.

SWEET PEAS. Winter Flowering.

Avalon. Clear even self blue with a pale blue keel. Makes luxuriant growth and four large ruffled flowers are the rule.

1/4 lb. \$5.00; per lb. \$18.00; 1 oz. \$1.50

Miss Santa Maria. Soft pleasing light salmon rose. Each flower is so completely duplexed that the extra petals resemble a miniature rose. We recommend this variety for late winter or early spring bloom.

1/4 lb. \$5.00; per lb. \$18.00; 1 oz. \$1.50

Snow Drop. This is a really outstanding early white. Extremely vigorous the flowers are pure paper white and of large size. This white seeded variety is sure to make a place for itself among the standards.

1/4 lb. \$5.00; per lb. \$18.00; 1 oz. \$1.50

Aster Super Giant Santa Maria

CELOSIA HARLEQUIN (Gilbert's)

Very uniform bush type developing both base and side branches until it is a mass of color. Grows 18 inches tall. The flowers at first are pink tipped with gold turning to salmon then to bright shell pink. Excellent for cut flower work and it makes a nice pot plant.

Pkt. \$0.75

CENTAUREA DWARF POLAR GEM

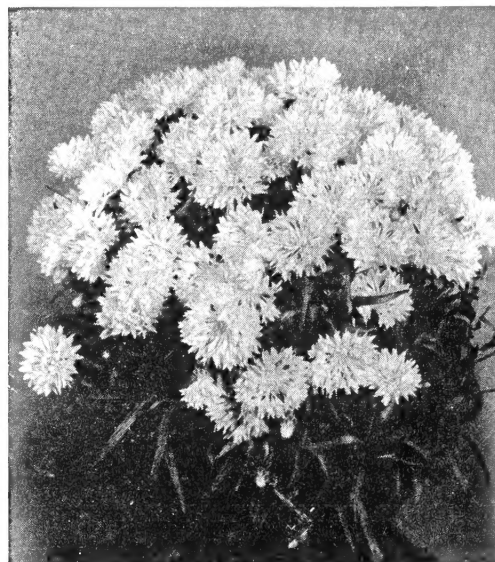

A nice companion to the blue Jubilee Gem to which it is similar except for color which is a creamy white.

1/4 oz. \$0.45; 1 oz. \$1.50; Pkt. \$0.35

IPOMEA BLUE STAR (700 S.) A.A.S.

Flowers of great size, earlier and larger than the popular Heavenly Blue. Carried in great profusion the flowers remain open well into the afternoon of cloudy days. The clear blue color is accentuated by five deeper blue mid-ribs to form a star.

1/4 oz. \$0.75; 1 oz. \$2.50; Pkt. \$0.35

Centaurea Polar Gem

LARKSPUR REGAL ROSE

A great improvement in the Imperial type. Resembles a delphinium, with long thick spikes and full delphinium like florets. Compact basal branching habit. Early flowering and excellent shipping quality. Regal White, Regal Pink, and Regal Purple will be offered for early delivery next fall.

1/4 oz. \$0.75; 1 oz. \$2.50; 1/4 lb. \$7.50; Pkt. \$0.50

Celosia Harlequin

Novelties and Items of Special Merit

Larkspur Regal Rose

TWO NEW HYBRID SNAPS FOR FORCING

Sunglow. This is the first bronze hybrid forcing Snapdragon. Our trials last winter proved it to be one of the best. The color is a golden bronze shade and it breaks freely, and flowers early and throughout the winter. Seed is expected to be available in time for midsummer sowing.

Per Pkt. \$3.00

Goldrush. There has been a need for a good yellow. One with a rich pleasing shade with the flowers properly spaced and production to compare with some of the pink varieties. Our trials were still incomplete when this catalog was printed but apparently this new hybrid has many of the qualities we need. Seed ready in May or June.

Pkt. \$3.00

STOCK COLUMN WHITE GIANT

Produces an enormous flower spike closely packed with fully double individual florets of large size. Flowers are a pure glistening white.

1/4 oz. \$3.00; oz. \$10.00; Pkt. \$1.00

STOCK COLUMN PINK GIANT

A counterpart of the above in a clear bright rose. We recommend you give both of these fine stocks a trial.

1/4 oz. \$3.00; oz. \$10.00; Pkt. \$1.00

NOTE: There have been a great many fine introductions in petunias during the past few years and we call your attention to our listings on Pages 15 to 17. One of our favorites is the variety Carmencita.

PETUNIA DWARF ERECT VELVETY CRIMSON

Velvet Ball has long been a popular variety because of its color but because it was necessary to hand-pollenize, the seed remained high in price. Velvety Crimson overcomes this obstacle and now we have a dwarf bedding petunia in this shade at a reasonable price.

1/8 oz. \$1.25; 1/4 oz. \$2.00; 1 oz. \$7.50; Pkt. \$9.50

PETUNIA DWARF ERECT SNOW MOUNTAIN

A new dwarf white of unusual uniformity and an abundance of blooms. The flowers are pure white and so closely spaced they make regular mounds about 1 ft. high.

1/8 oz. \$1.00; 1/4 oz. \$1.75; 1 oz. \$6.00; Pkt. \$0.50

ASTER SUPER GIANT SANTA MARIA

A glistening pure white very double immense flowers with curled and interlaced petals. Size and doubleness together with the strong stout stems make this an outstanding item.

oz. \$3.50; 1/4 oz. \$0.95; Pkt. \$0.50

ASTER TILFORD'S WILT RESISTANT

The new strain that has proven exceptionally resistant to the wilt disease. The flowers are very similar to the Royal type and are available in the following colors. White, Shell Pink, Rose, Purple, Mixed.

Pkt. \$1.00

VERBENA BUSH TYPE STARLIGHT

Similar in habit to Salmon Queen. Very uniform bushy habit about 8 to 10 inches high. Color is a bright mid-blue with creamy white center.

1/4 oz. \$1.50; oz. \$5.00; Pkt. \$0.50

MARIGOLD DWARF FRENCH ELDORADO

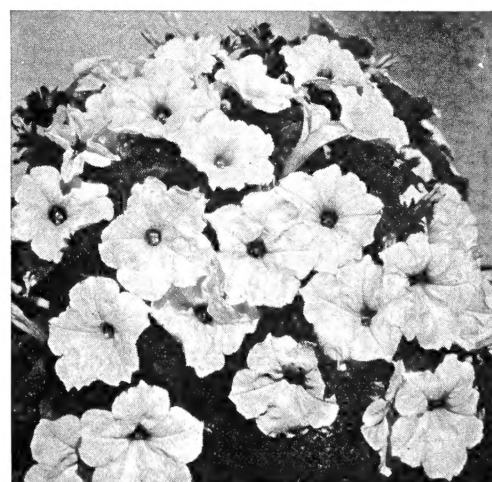

A live pleasing canary yellow, tinted slightly deeper toward the center of the full double flowers. Prior to this the dwarf class of Marigolds was without this canary yellow shade.

1/4 oz. \$0.50; 1 oz. \$1.75; Pkt. \$0.35

MARIGOLD FIREFLY

An outstanding addition to the Tall African group. "Firefly" is large flowered (4-5 inches) with deeply lacinated incurved petals. Color is a deep glowing orange with flowers standing well above the foliage. Having size, color and stem length. "Firefly" is an excellent cut flower.

1/4 oz. \$1.25; 1 oz. \$4.50; Pkt. \$0.75

Petunia Snow Mountain

Wilt is a soil borne disease and can only be entirely prevented by soil sterilization. This is comparatively easy and inexpensive. Where steam is not available, formaldehyde gives good results. We will be glad to furnish instructions on the use of this material. Where the soil is reasonably clean of wilt, good results may be had with wilt resistant strains such as we offer. Yellows is carried mainly by leaf hoppers and, to prevent infection, cloth or greenhouse protection is necessary. The longer stems and larger flowers usually pay for this extra care.

STOCKS

(19000 seeds per oz.)

With labor such a factor, this important cut flower assumes even greater importance. Sowing directly in the bench makes for stronger, more vigorous plants. Careful thinning, selecting the strongest notched leaved seedlings to remain and proper feeding with Greenhouse Vigoro or Hygro (every two weeks until buds form) will assure a high percentage of doubles.

EARLY OR WINTER FLOWERING

A deep rooting crop that does best in deeply dug ground beds although, with good care, they can be produced on raised benches. Many of our growers sow in early July for late fall and early winter crop. September sowing will flower February and March. We recommend using the Spring flowering type for November and December sowing. Varieties marked * have been most popular with our customers.

Growing Perennials From Seed—

is an easy and inexpensive method of getting a stock of these valuable plants. Many items are better grown from cuttings or divisions but even with these, selection can be made of choice seedlings which can then be propagated in the usual manner.

Seeds of perennials are mostly short lived, and therefore, time and method is important. Midsummer is usually recommended and it has several advantages. Usually the press of work is less at this period. However, most perennials want cool conditions for germination and in those areas where humid and high midsummer temperatures prevail, Spring is best, except for items usually classed as biennial such as Canterbury Bells, Digitalis, Pansy, Myosotis and Viola.

Where the work of transplanting is too much in the Spring, most perennials can be sown in open ground beds, in early April, in rows and allowed to stand until late August or early September when they can be transferred to permanent quarters.

SOMERSET'S Lawn Grass Seed

SUPERFINE EVERGREEN MIXTURE

This is indeed a superfine lawn mixture including mixed Bents and White Clover. The fine grasses included in this mixture germinate and develop slowly but produce a beautiful permanent lawn when conditions are favorable.

5 lb., \$4.00; \$15.00 per 20 lb.; \$72.00 per 100 lb.

OLD ENGLISH LAWN SEED MIXTURE

The result of skillful blending of various fine leaved grass seeds, including Creeping Bent and White Clover, produces a lawn of excellent quality and beauty enduring all season.

5 lb. \$2.95; Bu. (20lb.), \$14.00; 100 lb., \$65.00

SEASHORE FORMULA

Composed of grasses that will thrive under adverse conditions, such as sand low in fertility and moisture and intense heat.

5 lb. \$1.65; Bu. (20 lb.), \$12.00; 100 lb., \$55.00

SPLENDOR LAWN

A moderately priced mixture, containing no White Clover, that is capable of producing a satisfactory sod in a short time.

5 lbs. \$2.25; Bu. (20 lb.), \$8.75; 100 lb., \$40.00

SHADY LAWN

Blended of species that have been proven by test to best survive shaded and adverse conditions. This mixture is capable of producing a fine close knit turf under trees, in areaways, etc., where little sunlight is able to get through.

5 lbs. \$2.95; Bu. (20 lb.), \$14.00; 100 lb., \$65.00

LANDSCAPE

A thoroughly recleaned, weed free mixture, excellent for a quick sod.

Seed Sowing - - -

This is one of the oldest agricultural operations but it is surprising how often it is done carelessly or improperly. Science has discovered many aids in producing good germination but often they are not used.

The old method of using one part each of sand, leafmold and loam as a sowing medium, is still good, but better results can be obtained if seeds are sown on shredded sphagnum moss or **Vermiculite**. Both of these materials are practically sterile and reduce damping off to a minimum. Where soil is used it should be sterilized with formaldehyde. See under insecticides for directions.

Diseases may be carried on the seed and treatment of these is often helpful. Semesan is one product for this which is popular with many. The hormone powder, **Hormo Root A**, is also excellent, especially for fine seeds like Snaps and Petunias. The cost of treatment is slight.

Insects occasionally cause trouble, ants will carry away fine seeds, slugs and other insects will chew them off just after germination. Use chlordane for the ants and D.D.T. or one of the poison baits for the others.

Watering improperly can spoil even the most carefully sown seed. An aid to proper watering is the English style can with extra fine rose. The best method for fine seeds is that illustrated showing the use of the **Bird Subirrigator**. Even inexperienced growers can get good results with this method.

While some seeds like cool temperatures to germinate, most of them, especially the annuals, do best when temperatures run 65 to 75 degrees. The **Gro-Quick** cable and thermostat are excellent to maintain the even temperatures necessary for best results.

Your seedsman is doing his best to deliver to you high quality seed of good germination. Give your sowings that little extra care that means extra profits for you.

SOMERSET'S

Roses

Most of our roses are grown in the shadow of the snow capped peaks and glaciers of the Pacific Northwest where the climate is ideal for their development. We believe there are no finer roses, and they cannot be compared to southern grown stock which is often offered at much cheaper prices.

Prices, except where noted, \$0.75 ea.; \$6.50 per 10; \$60.00 per 100. Tied in bundles of 10, 30 or more at the hundred rate. Where less than 10 of a variety are wanted they will be charged at the each rate.

GOOD FOR COMMERCIAL CUT FLOWERS — GIVE GOOD RESULTS OUTDOORS OR UNDER GLASS

For the nurseryman or florist who wants something different this new class is the answer. Many of them can be disbudded and will produce outdoors, in your customers' gardens, flowers 6" to 7" or over in size. Grown in sprays they are attractive for garden decoration or cutting.

Commercially they can be grown outdoors or under glass. They respond well to shading and are excellent for commercial cut flowers. Different in petal formation and form, they are a welcome change. Under glass they flower from the middle to the end of October; outdoors, they bloom earlier as noted.

ALABASTER. A very early white of large size and good substance. Slightly incurved and will grow five inches across if disbudded. Every mum collection should have this one. September-October.

BALCOMBE GOLD. A bright old gold. Not a yellow; more of a bronzy orange. A color hard to describe. Flowers incurved and really large if disbudded. October.

BRONZE FREDA. Bronzy salmon with quilled petals. Quite frost resistant. October.

COPPELIA. This is quite a new shade, a bright Indian red—very startling and does not fade with age. Fine strong stiff stems that grow lovely in sprays. One of the best sellers in both plants and cut flowers. September-October.

CHINA GOLD. Bright golden bronze with quilled petals. Best in sprays. Late September.

CONQUEROR. Rich crimson. Will grow six inches disbudded but also excellent in sprays. Has exceptional keeping qualities as a cut flower. October.

CORAL QUEEN. A very lovely large salmon coral. A beauty. Good in sprays, also disbudded. Early October.

CRANFORD CREAM. Large incurved creamy yellow. Good disbudded or in sprays. Early October.

FRED A. A beautiful bright silvery mauve-pink, very lovely for cutting. May be disbudded but equally good grown in sprays. Makes a great wealth of flowers and very resistant to frosts.

GOLD STANDARD. This is a true early disbudding variety. The color is as deep as it is possible to get in yellow, with broad florets. Does not fade in sun or rain. May be grown up to 7 inches across. September-October.

INDIANA. Deep Indian-red with amber shaded center. October 1.

LED A. A large heliotrope pink; flowers 6 inches across when disbudded. Also good grown in sprays. Beautiful rolled petals. Stems are extra strong. October.

ROSE PRIMROSE. An excellent variety, one of the best in recent years. Fine variety either disbudded or in sprays. Nice long stiff stems. Salmon rose with a basal blush of gold. Not as early as some of the others, thereby lengthening the blooming season. Oct.

REVELLER. Bright chestnut red semi-double of good substance; real commercial market type on long stems.

SALMON FRED A. Lovely salmon pink with medium sized flowers. September-October.

SYBIL. Large lavender pink. Stiff stems. Good disbudded or grown in sprays. A real acquisition. Also an early bloomer. September.

TIGER. Striking yellow, bronze, and crimson combination. Very variable and all three colors may be found on one stem at the same time. Late September.

TRIXIE. Salmon apricot and pink with long spiky petals. Late September.

WESTBORNE. A rich dark red of good form. The darkest red we grow. Good strong stiff stems and strong florets that stand the weather well. Would say that you must have it as it is a very distinctive color and variety. October.

YOUTH. Delightful clear pink of good form. 6 inches across when disbudded. Early October.

Price above varieties of English Chrysanthemums Rooted Cuttings.\$8.00 per 100; \$70.00 per 1000.

ANTROL ANT TRAPS

An ingenious metal can that can be safely used without danger to children or pets for control of all sweet and grease eating ants.

Retails at \$0.15 each
Cartons of 12\$1.25

ARSENATE OF LEAD

A stomach poison used to combat most chewing insects. Because it discolors the foliage it is rarely used under glass.

4 lb. Bag \$ 1.25
Case 12-4 lb. Bags 12.50

AZOFUME "45" CANDLES

Used for fumigating greenhouses for the control of red spider and other mites. Four Azofume Candles weigh approximately one pound which will treat 25,000 cubic feet of greenhouse space. Wider range of safety permits its use on a great variety of plants.

Carton of 24 Candles\$10.80
Case of 4 Cartons (96 candles) 43.20

AZOFUME "10" DUST

Somewhat more effective than fumigation for controlling cyclamen mite under glass and on delphinium outdoors. Also excellent to control red spider on roses and phlox, also various mites attacking spruce and other trees. Excellent for control of spot infestations under glass.

4 lb. \$ 2.40
50 lb. 17.50

BENZO-FUME PRESSURE FUMIGATORS

Guaranteed to contain not less than 17½% of Azobenzene. These operate similarly to the familiar Nico-Fume Pressure cans. Recommended for control of greenhouse red spider. Kills the eggs. One pound will treat approximately 10,000 cubic feet. The ease of application and efficiency should make this as popular as the Nico-Fume.

CARBON BISULPHIDE SOIL FUMIGANT

A cheap and easily applied liquid useful for soil treatment. When placed in the soil it releases a heavy gas that is highly toxic to all forms of insects. When treating beds 1 lb. will treat approximately 16 sq. ft. and 2 lb. a cubic yard of potting soil. The above quantities will kill most weed seeds and some diseases and all insects. It will also condition the soil leaving it in a friable condition. For complete sterilization formaldehyde may be added.

NOTE.—This material is about as explosive as gasoline and the same care must be used in handling it.

NEWLY REVISED
MAINTENANCE OF SHADE AND ORNAMENTAL TREES

by Dr. P. P. Pirone

Dr. Pirone is one of the leading plant pathologists in the United States. His book thoroughly covers the field of diseases that affect trees and shrubs, with recommendations for their cure or correction. There are chapters on insects and their control, nutrition and other valuable information. Illustrated with well chosen photographs, it is a book every nurseryman and florist should have.

Post Paid \$6.50

DISCLAIMER. We, Somerset Rose Nursery, Inc., give no warranty expressed or implied, as to description, quality, productiveness or any other matter of any seeds, roots, bulbs and plants we sell, and we will not be in any way responsible for the crop. If the purchaser does not accept the above items on these terms, they are at once to be returned and the money paid for same will be refunded promptly.

Under present unsettled conditions, it is obviously impossible for us to guarantee that prices listed in this catalog shall be final for the year 1949. We shall make every effort to hold the line but we reserve the right to change any or all prices without notice.

NOTE CASH DISCOUNT: On all flower seed orders where cash accompanies the order 5% may be deducted. For all orders over \$25.00, 8% may be deducted. Vegetable and grass seeds, plants, insecticides, and supplies are not subject to this discount.

All seed orders are sent prepaid except for beans and corn and a few other heavy items in vegetable and grass seeds.

Shipment will be sent in the manner we judge most efficient unless otherwise instructed. Perishable items are usually best sent by Express. Parcel Post shipments travel at purchaser's risk.
